Introduction:

With God's help, we continue to move forward with the education of children. They are committed, intelligent children, with the desire to learn more and more every day. This year as well as the other years, we are working as a team, both directors, teachers, parents and children. We know that knot of three folds is not easy to release, for that reason these students advance faster than others because of the support of all areas.

March

- For the month of March we started with several activities, let's talk about some of them. Every Friday we have civic acts. They pray, sing the sacred notes of the National Anthem, oath, positive affirmations, memorized texts of the Bible, give explanation about the values that correspond to them, then share a story or memorized story of the Bible related to value. So far the following values have been seen: The value of love, Prudence, friendship, overcoming and honesty.
- On March 3, nature day, they made a model with recycled things they found along the way. To generate and raise awareness that they take care of the fauna and flora.
- The very happy boys and girls made a card to their father on his day, writing and expressing their love. On March 14 we celebrated the day of the athlete, we were doing several games.
- On March 21 was celebrated the day of poetry, the creation of a poetry. Discovering gifts, some dedicated it to their parents, others to their teacher. We celebrate the day of water, also instilling the importance of taking care of this liquid that is vital for our lives. The children drew and placed positive utensils in their drawings.

Values that have been seen during this quarter the value of Love, Prudence, Friendship, Overcoming, Honesty.
